## PROTiTE Chemical Anchor

**Two part polyester chemical anchoring injection system. Formulated for high bond strength and high load resistance.**

**PROTiTE Chemical Anchor** is ideal for anchoring threaded rod and reinforcing bar into concrete, brick, stone and masonry/hollow wall installations. Chemical Anchor is fast gelling and curing, and can be used in horizontal and vertical applications. It is low odour, styrene free and low in VOCs.

- Features a patented soft opening cap: No need to cut the bag before use.
- 300ml cartridge fits in a standard mastic or professional caulking gun.
- Two mixing nozzles included.

### WHY USE PROTiTE CHEMICAL ANCHOR...

- Extremely versatile.
- Fast cure anchoring - Load in 20 minutes.
- Use in damp & wet environments, including flooded holes.
- Styrene free - safe for use indoors, and in enclosed spaces.
- Trade Quality.
